AMENDMENTS TO THE CLAIMS

This listing of claims replaces all prior versions, and listings, of claims in the application.

- 1. (Currently Amended) A library of adenoviral vectors, wherein each member of the library comprises (i) a first heterologous DNA encoding a first gene product a vascular endothelial growth factor (VEGF), wherein the first heterologous DNA is common to each member of the library of adenoviral vectors, and (ii) a second heterologous DNA encoding a an second gene product, wherein the second heterologous DNA varies between the members of the library of adenoviral vectors.
 - 2. (Cancelled)
- 3. (Original) The library of claim 1, wherein the first heterologous DNA and/or the second heterologous DNA is operably linked to an inducible promoter.
- 4. (Original) The library of claim 1, wherein the first heterologous DNA and the second heterologous DNA are under the control of separate regulatory elements.
- 5. (Original) The library of claim 1, wherein the first heterologous DNA and the second heterologous DNA are under the control of a bi-directional promoter.
 - 6.-11. (Cancelled)
- 12. (Original) The library of claim 1, wherein the second gene product is fused to an activation domain, and the first gene product is fused to a DNA binding domain.
 - 13.-53. (Cancelled)
- 54. (Currently Amended) A library of serotype 35 adenoviral vectors, wherein each member of the library comprises (i) a first heterologous DNA encoding a vascular endothelial growth factor (VEGF) a first gene product, wherein the first heterologous DNA is common to each member of the library of adenoviral vectors, and (ii) a second heterologous DNA encoding a an second gene product, wherein the second heterologous DNA varies between the members of the library of adenoviral vectors.
